

Streptavidin-HRP Catalog number: IRRG8017 Application : WB, ELISA, IHC		Package size: 500ul
Description	Streptavidin is a 53 kDa homotetramer isolated from Streptomyces avidinii. Because of its strong non-covalent interaction with biotin, streptavidin can be used to detect and isolate biotinylated proteins. Streptavidin-HRP is useful for detecting biotinylated antibodies	
Stability & Storage	This product is stable after storage at: <ul style="list-style-type: none"> • 2-8°C for 6 months under sterile conditions from date of receipt. • -20°C or -80°C for 12 months under sterile conditions from date of receipt. Avoid repeated freeze/thaw cycles.	
Storage buffer	Phosphate Buffered Saline containing 40% glycerol and 0.01% ProClin 300, pH7.4.	
Form	Liquid	
Concentration:	1 mg/mL	
Application:	Western Blotting (WB, 1:5000-10000) ELISA (1:5000-10000), IHC (500-5000). Optimal working dilution for a specific application should be determined by the investigator.
